In many cases, it may be impossible to recover data and systems damaged by fire and water. Don't find out too late that you need a fire system or that your present fire system is outdated or in need of repair. Computer Sites, Inc. can help you by protecting your data, data center and infrastructure. We offer the assurance that only a specialty contractor can offer.

CLEAN AGENT GAS FIRE SUPPRESSION SYSTEMS

- FM-200 does not deplete stratospheric ozone
- Approved for use in "normally occupied" spaces
- Protecting over 100,000 facilities in more than 70 nations
- Does not leave behind oily residues, particulates, water, or corrosive materials
- Activated by "state of the art" addressable fire detection systems

EARLY WARNING AIR SAMPLING SYSTEMS

- Air sampling systems can give advanced notification hours before a fire occurs
- Air sampling monitoring points can be placed inside critical electrical cabinets
- Use of air sampling systems reduces the chance of activating water sprinkler systems that protect sensitive electronic equipment

PRE-ACTION WATER SPRINKLER SYSTEMS

- Sprinkler lines over the Data Center are "water-free"
- Sprinkler lines are constantly supervised for leaks using air pressure
- Sprinkler lines are filled with water only when fire alarms are activated in the Data Center
- Activation of pre-action water sprinkler system automatically notifies the local Fire Department

ALSO AVAILABLE:

- **NFPA Semi-Annual Fire Inspections**
- **Portable Air Sampling for Spot Checks, Odor Identification**
- **Graphic Panel Updates**
