Recovery Room Wall Padding

All Induction and Recovery Rooms are custom made, with windows, outlets and handles cut out. Our padding is made of high density, open cell or closed cell foam, covered in 22-26 oz. nylon reinforced vinyl. You choose the density (soft – extra firm), and height of pads. Thickness is available in 2" or 3".

Offering three mounting systems:

• Pressure Treated Woodbacked - to bolt up
• Portable D-Ring System
• Velcro – Velcro adhered to back of pad, metal strips with Velcro mounted to wall

Dandy Products’ Wall Padding is easy to install and maintain.

Floor Pads

Large pads to cover the floor for recovery. Custom sized, thickness from 6" and up recommended. Can be made into sections that Velcro together for easy handling. Made of open cell, soft – firm foam, covered in 22-40 oz. nylon reinforced vinyl. Breakaway Velcro handles can be added.
**Stocks/Gates**

We can pad any size or shape stock or swing gate. All are custom made of 1" - 6" thick high-density foam, covered in 22-26 oz. nylon reinforced vinyl. Easy to clean and disinfect. Our stock and gate pads withstand high traffic and heavy use. Mounting systems: Wood Backed, Velcro, Buckles, Lace Up or a Slip Over one piece.

**Neonatal Foal Bed**

80" (W) x 30" (H) x 36" (D) 3" thick high density, medium firm foam, covered in blue flame-retardant vinyl. Aluminum framed bottom, to protect when moving. Four individual pieces that Velcro together for easy assembly. Can be custom sized.

- Non-slip
- Spike Resistant
- Easy to clean and disinfect
- Excellent coefficient rate, wet or dry
- Attractive colors
- Adheres to smooth cement Regupol Basemat

Made from 100% carefully selected recycled rubber.

Puncture Resistant Linatex®

A unique laminate of puncture-resistant “Linatex®” and energy-absorbing foam provides protection and safety for your animals. Linatex® animal recovery room floors have been installed in numerous public facilities (such as zoos and universities), private hospitals and veterinary practices worldwide. It is a unique laminate of puncture-resistant Linatex® over specially formulated closed cell foam. This unique laminate provides the optimum in animal protection and safety.

The heart of the laminate is the Linatex® top cover. A fabric interface distributes the animal’s weight between the Linatex® surface and the energy-absorbing foam. Linatex® is a premium grade natural elastomer with the following benefits:

- Maximum protection against injury due to high resiliency
- Minimum leg/back stress because of the resiliency and the unique way the laminate distributes the animal’s weight
- Resistant to penetration of the animal’s hooves, due to excellent cut and tear resistance
- Absorbs twisting action because of exceptional elongation characteristics
- Slip resistant due to the high coefficient of friction
- Easily cleaned and fast drying smooth, non-absorbent surface
- Custom installation by Linatex® personnel

Linatex® animal recovery room floors are an investment; they are the first choice for veterinarians and administrators because the unique benefits of the product result in the highest levels of animal safety, long term savings, and reduced insurance risks.

MATERIAL SPECIFICATIONS:
Linatex Veterinary Floor - 3 layers, 1 1/4" high density closed cell foam base layer, bonded to concrete floor 12 lb./sq.yd. griego duck canvas tie layer (bonded between base and top layers), 3/8" thick Linatex natural rubber
