

Air Conditioning

SYSTEMS

PRODUCT OFFERINGS INCLUDE:

- Down-flow & Up-flow Designs
- Air, Glycol-cooled and Chilled Water Systems
- Free Cool Options Available
- Stand-alone Room Units
- Ceiling Mounted Units
- Portable/Emergency Units
- System Upgrades & Expansion
- System Inspection & Service

Computer Sites, Inc. provides knowledgeable, experienced air conditioning experts that understand the complexities and challenges of cooling in live data centers. We're committed to delivering outstanding service that no other company can equal.

AIR CONDITIONING SYSTEMS

- **Glycol/Water Cooled Systems:** 3 to 30 Ton cooling capacity units
Application: Cool weather environments allowing free cool function
- **Air Cooled Refrigerant Systems:** 3 to 30 Ton cooling capacity units
Application: Hot weather environments
- **Chilled Water Systems:** 3 to 30 Ton cooling capacity
Application: Building based tower systems

MULTIPLE APPLICATION UNITS

- Down-flow units for data center and clean room applications
- Up-flow units for switch room and electrical room applications
- Ceiling mounted units for telecom closet and spot cooling applications
- Portable units for emergency or temporary cooling applications
- Industrial units for utility room and factory floor cooling applications

FEATURES

- Humidification/De-humidification systems
- Redundant, direct drive fans
- High air flow with large coils
- Dual refrigeration circuits for redundancy
- Free cool coil option on glycol cooled units
- Microprocessor based control systems

ACCESSORIES

- Stand alone steam humidifiers
- Independent air filtration systems
- Independent monitoring systems

MAINTENANCE & SERVICE

- 24 x 7, full service, maintenance programs
- Customized programs to fit customer needs and applications
- National, accredited partnerships for full service and emergency response

ALSO AVAILABLE:

- **Particulate Count Measurements**
- **Air Balancing Service, Air Flow Analysis**
- **Hot Spot Management**
