DURA GRIP II™ Steps & Rails

Significant Improvements to Dura Grip II™ Steps

In early December of 2008 we implemented several significant improvements to our already reliable Dura Grip II™ steps.

A NEW non-slip surface added to the top and tread of each step. A special long-lasting granular surface is added then encapsulated with gel coat for long term slip resistance. This new feature greatly reduces the potential for slipping on steps.

The fiberglass strand process used in production has been modified, resulting in easier handling & smoother corners.

10 YEAR prorated product warranty!
With the addition of these process upgrades, and as a reflection of outstanding past performance, Style Crest is extending the warranty period to an industry exclusive 10 YEAR prorated product warranty!
