DESCRIPTION

This project consisted of a 4-story multivenue arena facility. This building is a bowl shaped arena with a seating capacity varying between 8,700 seats in hockey mode to 10,500 seats in concert mode. Additional features include: one hospitality suite for 90 persons, 33 luxury suite, three lounges, one restaurant, approximately 2,000 SF of retail space, concession stands and lavatory facilities. The building structure consists of structural steel on spread footings and precast concrete seating bowl on spread footing. The building envelope consists of masonry cavity wall construction and exterior insulation and finishes system for wall construction and a mechanically attached TPO membrane on rigid roof insulation. The project also includes fire and domestic water connections, electrical connections, telephone utility connections, gas utility connections, cable TV utility connections, and close circuit TV connections. Associated paving, walks, site lights and landscaping were also included. With a project cost of 45 million, the size of the building was 207,000 square feet.
